Introducing ISOframe Lumen

Luminate your brand with Lumen lightbox modules

ISOframe Lumen is our portable, modular lightbox display stand, and is the perfect self-build exhibition solution.

Lumen can be used as individual modules or magnetically connected together to create larger continuous displays. The ingenious framework is made of lightweight aluminium and simply slots together, without the need for tools.

The built-in LEDs connect automatically as the frame is assembled. Plug it in for an instantly eye-catching display.

Using silicone-edged tension fabric, the Lumen swiftly transforms into a vibrant exhibition stand within minutes. All Lumen modules can be used as either single-sided or double-sided displays.

That's intelligent exhibiting!

ISOframe Lumen gives you total flexibility to make a big impact for your brand at any event

Pre-installed LEDs sit protected in the aluminium frame

The entire system packs neatly into a slim padded transport box

Simple, tool-less assembly

Ability to magnetically join Lumen panels together to create back-lit display walls

Get creative and connect multiple modules

To create larger displays, each module magnetically connects to the next - no need for any tools! Create long back walls or corner configurations.

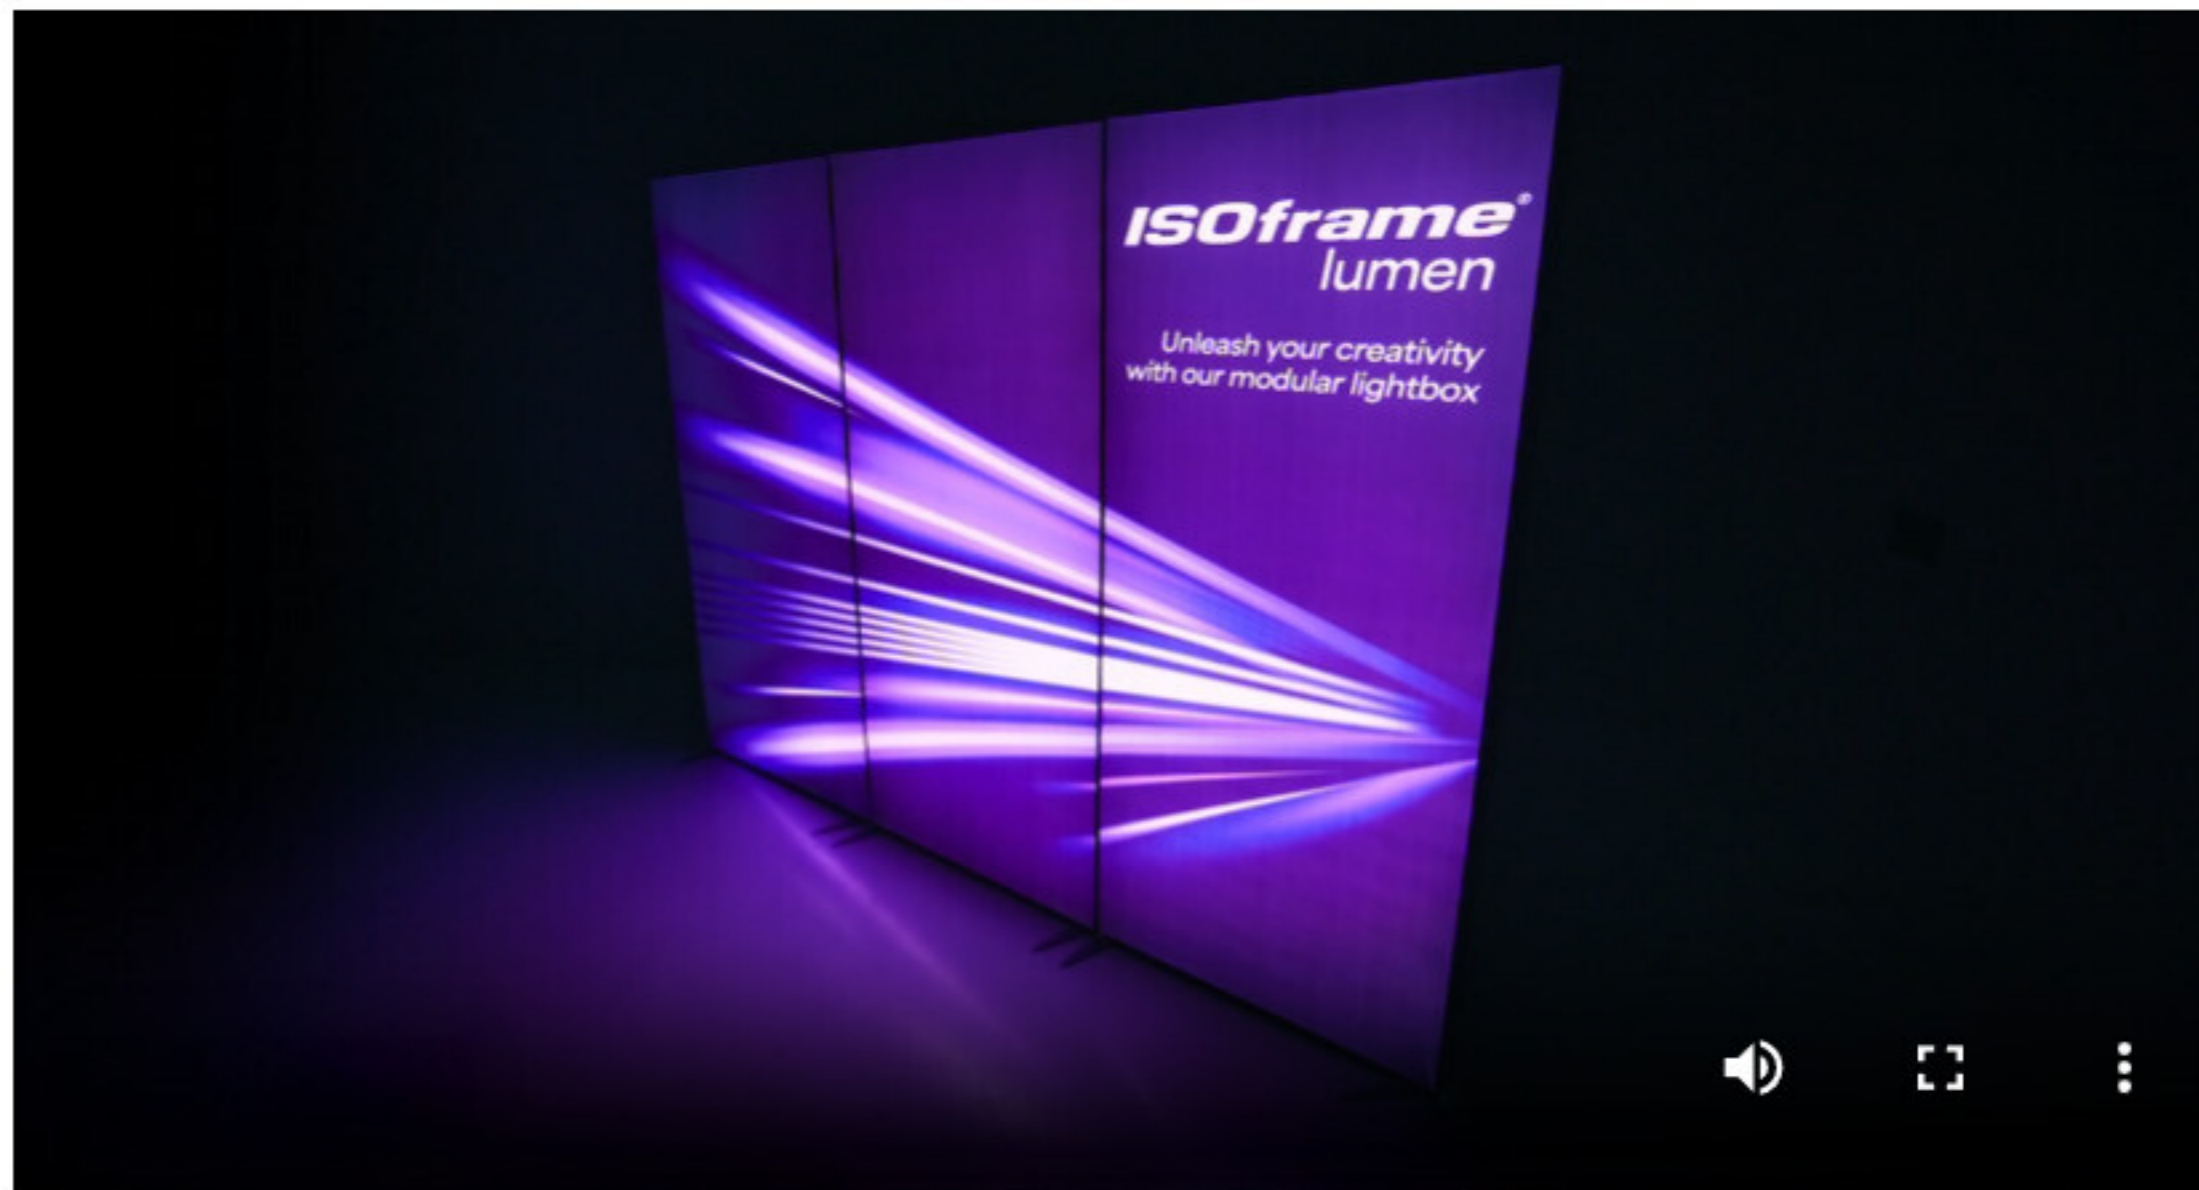

Not only is it visually striking, but it's also incredibly portable. The entire system packs neatly into a slim padded transport box which fits easily into the boot of a car. Plus, you can rest easy - there's a 10-year no-quibble guarantee on the framework.

Lumen modules are available in 3 height options and if you already have other ISOframe stands, you can integrate Lumen panels seamlessly, making your display even more impressive.

In a nutshell, the ISOframe Lumen back-lit exhibition stand is a fantastic solution for creating a visually stunning and adaptable display, whatever size your event space.

Each Lumen module is supplied within a lightweight padded transport box.

Pre-installed LED lights connect automatically as the frame is assembled.

Lumen modules connect together with magnets built into the framework.

LED backlights

Bright, pure white pre-installed LED lights for maximum illumination of your brand.

Magnetic framework connections

For larger displays, modules automatically join together using built-in magnets.

'Close-to-wall' base supports

Our special base supports allow modules to be placed tight against a wall to maximise your exhibition space.

Three height options

Lumen modules are available in 3 heights: 2270 and 2470mm

2270mm

2470mm

Portable

Each Lumen module is supplied within a lightweight padded transport box.

Easy to assemble

The aluminium Lumen framework connects together without the need for tools. The LED lights and transformer are pre-installed into the framework, and automatically connect.

Interchangeable graphics

Washable, silicone edge fabric graphics can be changed and updated to suit your message.

Three width options

Lumen modules are available in 3 widths: 800, 900 and 1000mm.

Create your stand

Integrate our NEW Lumen modules into ISOframe Wave

All ISOframe products are fully compatible so you can really get creative and add punchy Lumen lightbox modules to our famously flexible ISOframe Wave system.

If you need an exhibition stand with even more flexibility then why not combine ISOframe Wave with Lumen lightbox modules. Lightbox modules can be integrated directly into the display using built-in magnets. Create a seamless link between traditional rollable graphics to backlit graphics.

Why not add freestanding Lumen Modules into your event space for a stunning display that will leave your competitors in the shade.

Add multiple ISOframe Lumen modules into your new or existing Wave exhibition stand

Create a seamless link between traditional rollable graphics and back-lit graphics

Tool-less assembly and magnetic integration into the ISOframe Wave framework
