LIGHTWEIGHT | PORTABLE | SELF-BUILD

The flexible self-build exhibition stand that adapts to your event space

ISOframe[®]
intelligent exhibiting

Introducing ISOframe Wave

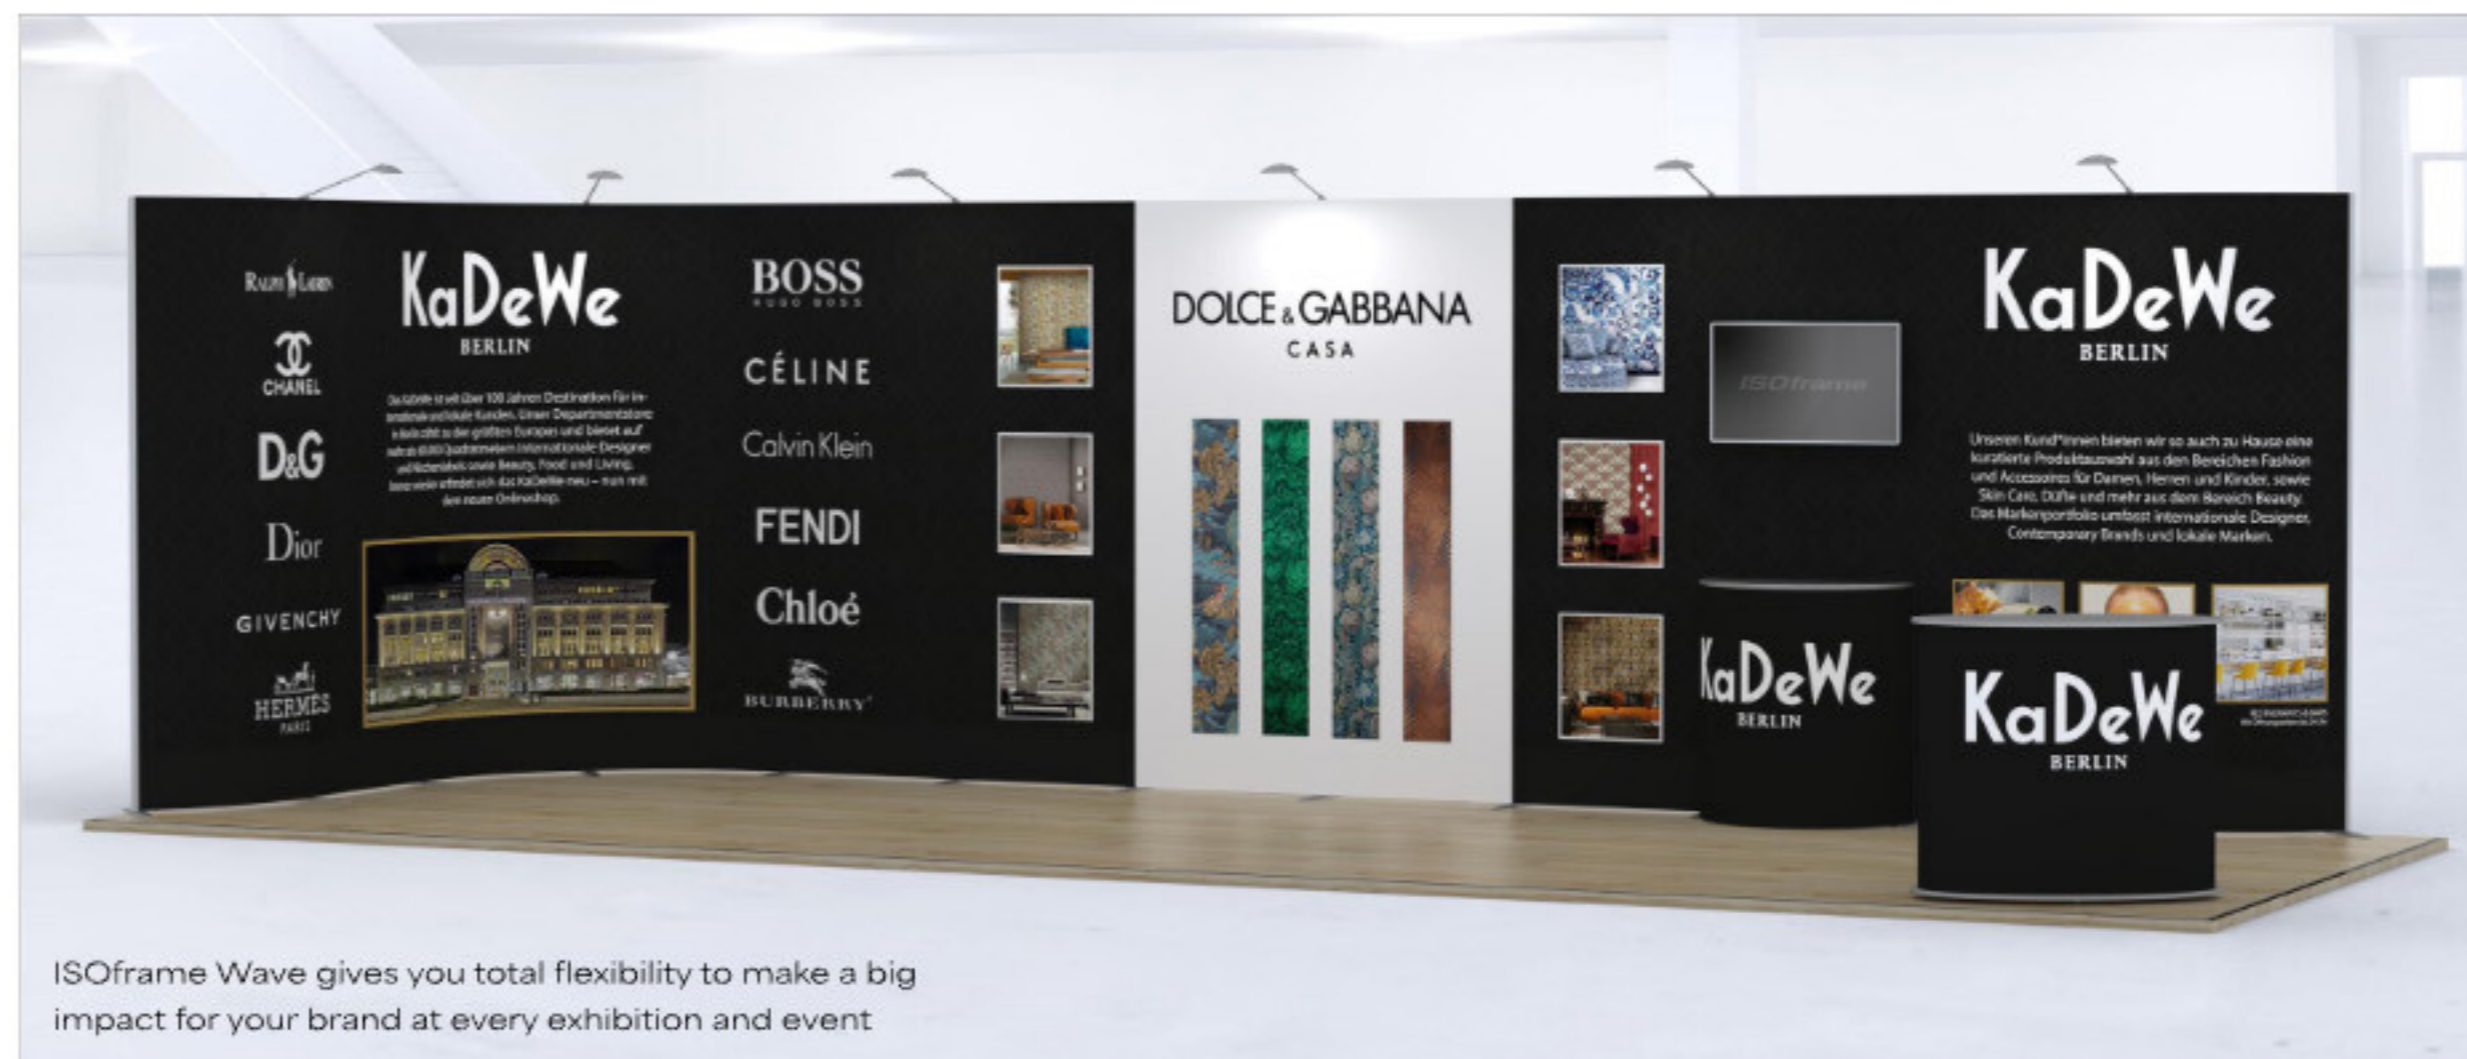

Are you looking for a self-build exhibition stand?

Chances are you're looking for an exhibition system that's lightweight, portable and easy to assemble.

ISOframe designed and developed ISOframe Wave to be the most flexible and user-friendly portable exhibition system on the market.

Unique, and patented across the World, ISOframe Wave uses a modular aluminium framework that's assembled without tools and, due to the innovative FlexLink beam, the stand can be bent & shaped to fit any event space.

ISOframe Wave can be reconfigured, resized and reused giving you total flexibility to make a big impact for your brand at every exhibition and event. That's intelligent exhibiting!

ISOframe Wave gives you total flexibility to make a big impact for your brand at every exhibition and event

ISOframe is manufactured in the UK by ISOframe Exhibitions Limited

Free 3D stand design by our in-house team of designers

Ten-year no quibble framework warranty and a one-year warranty on all graphics

Working in partnership with ISOframe

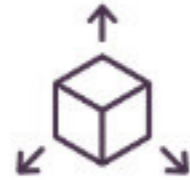

Bring your stand to life in 3 easy steps

Our proven approach to creating cost-efficient, unforgettable exhibition stands.

Listen

First things first, what do you need? We actively listen to all your requirements and make sure all the major factors are considered. That's how we know that your new exhibition stand will appeal to your audience, and be ready on time and on budget.

Create

Now we fully understand your requirements, ISOframe's design team uses 3D design tools to create some examples for you to choose from. You get to see what it's going to look like in real life, and you approve the best concept before you commit to the purchase.

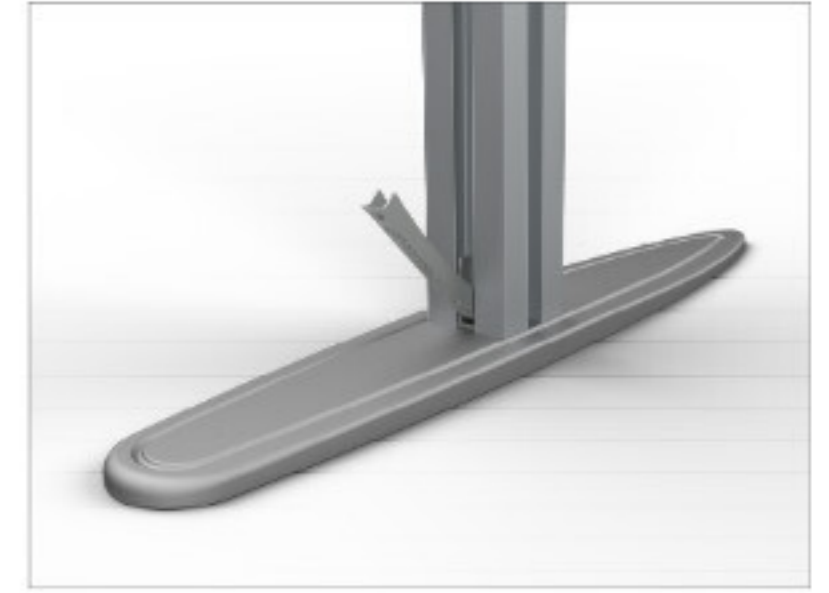

Pre-build

Come and see your fully built stand before your event. Check all the details before sign off and remove those pre-show worries. Before you even arrive to see it, we've done our own quality control checks, and there's always enough time for any last minute adjustments.

Our patented tool-less FASTclamp connector allows you to add tables and accessories easily

Attach base supports easily with our FASTclamp connector

Easy to transport, easy to assemble

Our self-build ISOframe Wave stands have been designed to be transported in the boot of most cars in tailormade wheeled transport cases.

And you don't need to be an industry expert to set up any of our systems. Our patented FlexiLink and FASTclamp connector means you can leave your tool kit at home and built without the need for tools.

All of our stands come with a full set of step by step building instructions and online training videos are available. We even offer free training if you collect your kit. That's intelligent exhibiting.

See what our customers have to say...

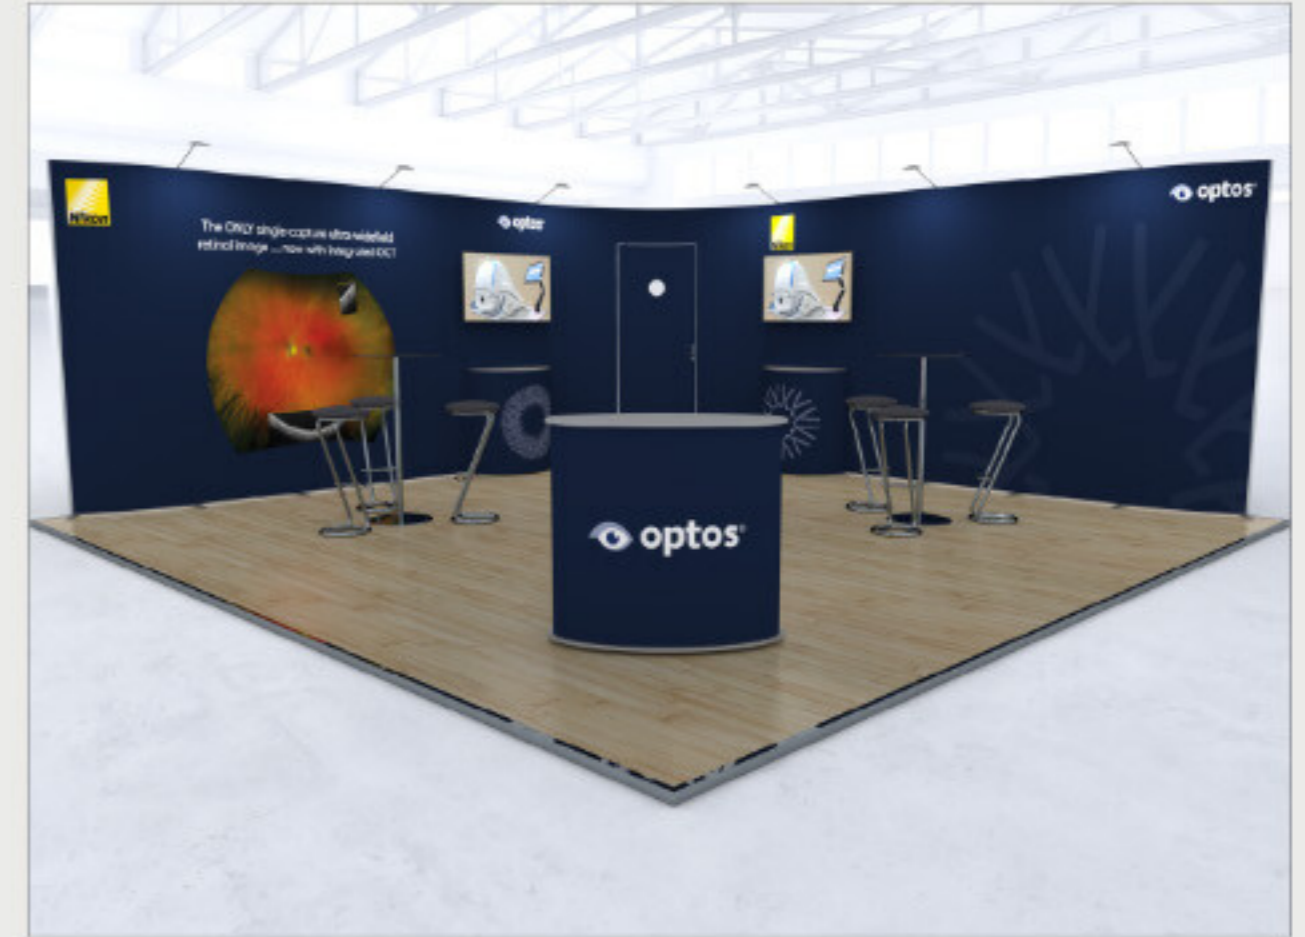

“Our booth looked amazing (I think it was among the best) and we definitely stood out from the crowd. As promised it was easy to set up and take down. Thank you for the support you and your team gave us on the run up to the conference - we wouldn't have got there without your help!”

Carrie Fidler
Director of Value Communications
Heor

“We have developed a lasting partnership with ISOframe. They have taken the demands of a packed European schedule in their stride, making a challenging experience more straight-forward.”

Ebru Hamilton
Senior International Marketing Manager
Optos PLC, ISOframe customer since 2015

“The Stand got brilliant feedback and it was fabulous to see it in action. Thanks again for all your amazing, fantastic support - really enjoy working with you on this exciting project.”

Dawn Theaker
Marketing Manager

Integrate our NEW Lumen modules into ISOframe Wave

Add a freestanding Lumen Module into your Wave kit for a stunning display that will leave your competitors in the shade.

Introducing our latest addition to the ISOframe range: Lumen backlit fabric modules designed to seamlessly integrate with Wave displays or be used free-standing in your exhibition space. These lightbox modules effortlessly connect with Wave using built-in framework magnets, blending traditional rollable graphics with fabric graphics for a polished look.

Easy to integrate with existing framework or have as an optional extra alongside shelving or TV screens. For further details, click below.
